

2017 ANNUAL REPORT

Rowan University

University Libraries

“The Librarians are constantly looking for ways to support the missions of the University and its Libraries.”

A MESSAGE FROM THE ASSOCIATE PROVOST

As we continue to strengthen our role as a 21st century organization, the Rowan University Libraries have embarked on a strategic planning process. New vision and mission statements direct our attention on leadership and excellence. We are focusing on our user communities: students, faculty, researchers, clinicians, and administrators. We recognize the sense of urgency that surrounds so many activities today. To that end, we continuously look at ways to improve our services and spaces. We are working with the members of our user community in ways that are collaborative partnerships.

Libraries are challenged in their provision of space. We still need to offer those quiet spaces for silent, meditative learning. Others are looking for places where they can actively engage in conversations with classmates and colleagues. Still some others are looking for spaces where they can create new forms of scholarship using the latest technology. Remodeling efforts underway and in process reflect these needs. The Libraries are increasing our role in supporting and promoting of student and faculty research and learning. New advanced degrees require changes to the breadth and depth of the resources we provide. We also want to make our unique collections, those that only Rowan University has, more visible and accessible. To fulfill this goal, we will relocate Special Collections to a more prominent location in Campbell Library. The Libraries have developed strategies to promote our resources and the research of the University faculty on all three campuses through a newly designed website and through Rowan Digital Works, our institutional repository.

Our most significant resource is our Librarians and staff. The Rowan University Librarians are excited to actively contribute to this dynamic institution. Regularly engaging

in learning opportunities and attending conferences, our Librarians are sought out to share their wealth of knowledge on contributing to student and faculty success. The Librarians are constantly looking for ways to support the missions of the University and its Libraries.

A leader in access, service and user experience, Rowan University Libraries is the cornerstone of each academic campus. As partners in education, we look forward to fulfilling the curricular, research, and clinical information needs of the Rowan University community.

Scott P. Muir
Associate Provost
Rowan University Libraries

I am passionate about Libraries and how they benefit our communities.

ABOUT US

At Rowan University Libraries, we strive for excellence in every effort, every day. We work diligently to provide services and resources that are of excellent quality, accessible and innovative. We focus on supporting student and faculty success by collaborating with them to ensure we hear and meet their needs. In order to be purposeful with our work, we have updated our mission and vision statements.

ABOVE: Just weeks before spring semester finals, students fill the 4th floor study area as they prepare for exams and final projects. BELOW: Librarian Bruce Whitham demonstrates how to use an e-resource for a student's final project.

OUR MISSION

A leader in access, service, and user experience, Rowan University Libraries anticipates and fulfills the curricular, research, and clinical information needs of our community.

OUR VISION

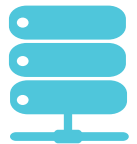

Information empowerment through innovative technology and exceptional service.

OUR STRATEGIC PLAN

With the University's Four Pillars in mind, we are currently working on our Strategic Plan. Several committees are meeting to discuss a variety of topics and concerns. We anticipate that our Strategic Plan will be finalized in the 2017-2018 academic year. We look forward to sharing our plans and are excited to see a clear path for Rowan University Libraries.

RENOVATIONS

ABOVE and BELOW: Images show the newly renovated spaces at the Rowan University School of Osteopathic Medicine Health Sciences Library in Stratford.

The RowanSOM Health Sciences Library underwent a complete physical renovation during the summer of 2016. New furnishings, carpeting and paint updated and improved the look of this popular space. Additional study spaces include a banquette study area, individual study desks throughout the Library, new, larger carrels, and new study tables. All study spaces have electrical outlets and the individual work areas have lamps as part of their configuration. The various sizes, shapes and configurations of the furnishings provide many areas for individual and group study and new chairs offer comfortable seating throughout the Library.

As part of the Library's renovations, an exhibit case was installed which enables the mounting of displays on various topics. The inaugural exhibit highlighted the cartoon art of faculty member Dr. Marvin Herring. Subsequent exhibits highlighted the history of RowanSOM, student and resident physician publications, African-American history month and biographies and photos of women who have made important contributions in science and medicine. Plans for new exhibits include faculty and student artwork, cultural diversity shown through a variety of clothing, fabrics and artwork, celebrating the birthday of Dr. Andrew Taylor Still and the history of Osteopathic Medicine and many other topics.

WORKING WITH ADMISSIONS

Librarians serve on the RowanSOM Admissions Committee. This role includes meeting with student applicants, reviewing documentation, and participating in the decisions regarding acceptance to the School. During the course of the year, librarians conducted interviews with 56 candidates and reviewed 140 applications from students wishing to be included in the Rowan SOM Class of 2021.

A VALUABLE COLLABORATION

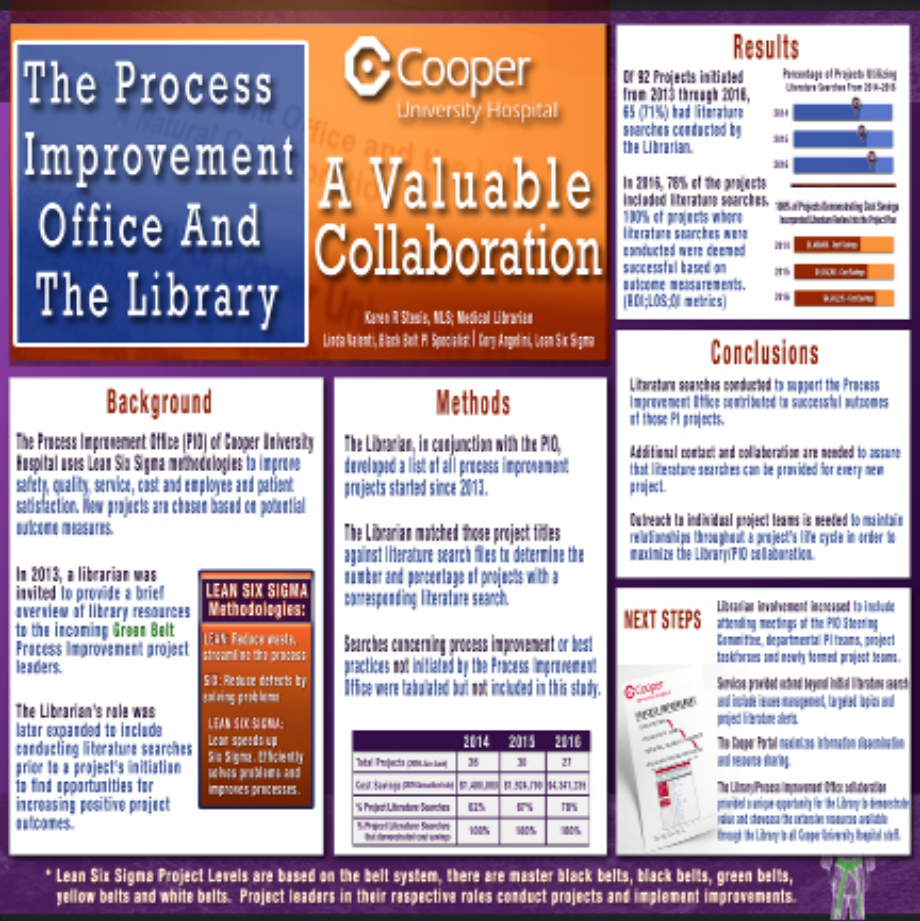

The Process Improvement Office (PIO) of Cooper University Hospital uses Lean Six Sigma to improve safety, quality, cost and patient satisfaction. New projects are chosen based on outcome measures. In 2013, Karen R. Stesis, a medical librarian, was invited to provide a brief overview of library resources to the incoming Process Improvement project leaders. This role was later expanded to conducting literature searches prior to project initiation to increase the effectiveness of PI projects and to assist in obtaining positive project outcomes.

Of the 92 PI projects initiated from 2013 through August, 2016, 65 (71%) had literature searches conducted by the Librarian. In 2016 alone, 78% of the projects included literature searches. 100% of projects where literature searches were conducted were deemed successful based on outcome measurements.

Literature searches conducted to support the PIO contributed to successful outcomes. As a result of these efforts, the committee saved the hospital \$2.4 million.

A new Standard Operating Procedure was finalized to assure that literature searches are conducted in the initial phase of each project. Karen now attends monthly meetings of the PIO Steering Committee, where progress on all projects is discussed. This allows additional opportunities for the Librarian to network with the project teams and to participate on new departmental PI teams.

RIGHT: This poster was created to demonstrate the successful partnership between the PIO and the Library, and the impact the partnership had on the Hospital.

ABOVE and BELOW: Service desks on the first and second floors of Campbell Library now make public services more accessible to patrons with physical disabilities.

BUILDING UPDATES

During the 2016–2017 academic year, funds from the Keith and Shirley Campbell Library Endowment were used to update existing service desks to meet ADA requirements, making public services more accessible to patrons with physical disabilities.

The first floor was remodeled and now includes a new circulation / information desk that is wheelchair accessible as well as new lighting throughout the entrance hall. Another important addition is ADA compliant furniture for students to use for scanning, stapling, and assignments. Two new screens for scrolling program announcements or marketing of resources were installed as well.

In addition, the large reference desk was removed from the second floor and replaced by two ADA compliant consultation desks. These desks are designed so that students can sit beside a librarian for a research consultation or sit with a student tech worker to deal with technology issues.

WEB LAUNCH

Rowan University Libraries launched new websites for Campbell, CMRSU, and SOM Libraries that involved focus groups, studying users, interviewing constituents, reviewing usage data, and consulting other academic libraries. The websites are designed with the unique needs of each library, ensuring that each of our websites is engineered with its specific users in mind.

After a year-long process, this new site will result in more satisfied users who can find and interact with library resources and services in much more intuitive ways, contributing to faculty and student success.

This year Campbell Library hosted a variety of events both on and off the Glassboro campus, including one bus trip, one lecture, three performances and one discussion panel. In the fall semester, a bus trip was organized to coincide with the University selected book called “Americanah”. 125 students hopped on the bus to Washington D.C. and visited the National Museum of African American History and Culture. Response from the bus trip was overwhelmingly positive. One student said “Wonderful opportunity that Rowan’s library and student life presented to the students.” Additional feedback demonstrates Campbell Library’s positive impact on campus life.

ABOVE: Librarian Samantha Kennedy (far left) stands with a group of students who attended a bus trip to Washington D.C. The bus trip was centered on the selected book “Americanah”. BELOW: Dr. Timothy Schwarz plays the viola with music students in Campbell Library’s Performing Arts Collection.

ABOVE: During National Library week with the theme of Libraries Transform, author and professor Dr. David Bianculli discusses how TV transforms and impacts our culture.

The mission of the Digital Scholarship Center is to develop and curate innovative digital scholarship projects, educational resources, and collaborative programs, and to advance and extend creativity, learning, research, scholarly communication, and teaching at Rowan University.

The DSC is a crossroads of education, creativity, collaboration, and technology. The Digital Scholarship Center is an inclusive space where all members of the Rowan community have equal opportunity to enhance technological literacy, organize and present their research, and express themselves creatively in the digital world.

ABOVE: Artist Daniel Chard discusses the nature of creativity and living a creative life. BELOW: Entrepreneur Christian Marin, founder of fitDegree, teaches a workshop on how to get started developing your own mobile app.

The DSC offers a wide variety of services including one-on-one consultations, workshops, talks, assistance with digital course projects, student and faculty software assistance, access to high quality computers and equipment for individual and group use. The DSC also offers support for student entrepreneurial startup and research groups, developing digital archives, projects concerning primary resources, and development of tutorials and digital learning material.

WORKSHOPS

This year the DSC hosted 2 creativity talks and 7 workshops. Workshop topics included Photoshop Basics, Intro to Editing Video, Intro to Shooting Video, Introduction to Mobile App Development, Adobe Illustrator Basics, and Creating a Website with Tumblr. The first creativity talk, called The Natural Creative Self, was given by internationally known artist Daniel Chard. Daniel discussed the nature of creativity and developing a creative life, how we gain insight through studying creative behavior. The second creativity talk was presented Nancy Ohanion, a nationally syndicated political artist. The talk was called The Art of Play, Experimenting, and Mistakes. Nancy described the creative process and how it directs her thinking toward visual solutions in political art.

GLASSBORO SUMMIT DIGITIZATION

The Glassboro Summit Collection is an excellent example of the opportunity available through the Digital Scholarship Center. The Glassboro Summit Collection is a website and digital collection, created by the DSC, in collaboration with Rowan University Libraries, University Publications, and University Archives & Special Collections. Its focus is to provide students, historians, and community members access to primary and secondary resources related to the Glassboro Summit. The collection is intended as an educational resource to inspire new scholarship and learning about the Cold War, diplomacy, the Glassboro Summit and how the summit impacted the local community.

Visitors to the site can search archival material for educational purposes, contribute items for possible inclusion into the collection, and review a comprehensive resources list to aid in the research and study of the Glassboro Summit and its impact. To view this digitized collection, please visit the website below:

<http://www.glassborosummit.com/>

STUDENT WORKER TESTIMONIAL

"The interactive and learning environment that has been created for student workers at the DSC has enabled me to learn a variety of things including website designing, iOS and Android app development, Photoshop experiences and so forth. Currently I have developed my own 2 android apps and I am working on creating my own website with the help of my manager and my co-workers. I have never had these experiences before but in these 4 month of my employment at DSC I have managed to learn all the things I mentioned above.

The help and support that we give to students that come to DSC was very interesting to me and has helped me to improve my social skills and professional approach to people.

These are a few things that I have achieved in being a student worker at the DSC and I look forward to learning more and assisting students with efficient skills in the years to come."

- Anwar Hussein, Junior

RIGHT: DSC student worker Anwar (far back) participates in a conversation with fellow students. Anwar has recently been accepted into the College of Engineering.

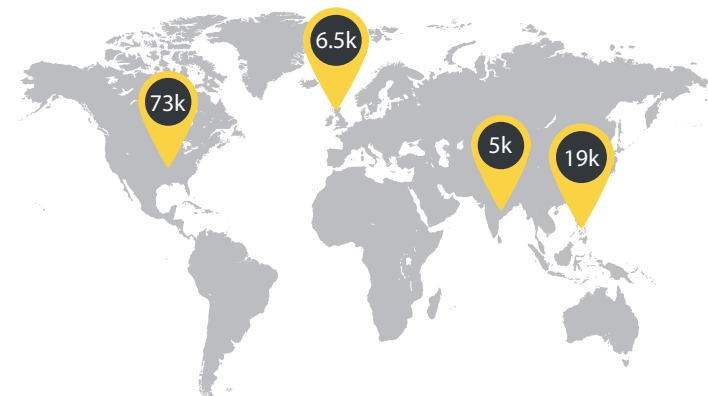

Rowan Digital Works (RDW), an institutional repository, provides open access and global visibility to the scholarly, creative and cultural works of Rowan University. A service of Rowan University Libraries, RDW promotes the valuable work accomplished by students and faculty, supporting Rowan University's significant role as a research institution.

To ensure RDW curates and highlights meaningful, quality research, librarian Denise Brush, the chair of the Institutional Repository Committee, attended a three-day training course at Berkeley Electronic Press in California, and is now a certified Institutional Repository Manager as of March 2017.

In an effort to enhance visibility of faculty research, RDW added a new component known as Researcher Profiles. Profiles can be created for any faculty member to showcase their research activity, but are particularly valuable for new tenure-track faculty. Each profile includes a photo, biographical information (e.g. education, previous employment), current research interests, and a selection of their most important published scholarly work. Since last July, library staff has created 103 Researcher Profiles. A recent enhancement to the Researcher Profiles site is a new interface that allows users to "Discover Experts at Rowan University." It displays three Trending Experts (faculty with the most downloads) and Trending Research Topics, with ways to search or browse profiles based on name, research interests, or college/school. Profiles now include "badges" identifying faculty members as research Collaborators and/or student Mentors.

Many members of our faculty have published articles in open access journals, which we have uploaded to their college's Faculty Scholarship page in Rowan Digital Works. Currently there are 91 publicly available faculty works in RDW. Our two newest RDW collections are the Open Educational Resources collection, which currently contains two open access computer science textbooks, and the Physics Electronic Microscope Project, whose data is currently shared only with external collaborators but will be available worldwide once the grant is done.

Since last August, Rowan University faculty and graduate student scholarship has been downloaded 171,709 times by countries around the world. The above graphic shows the number of downloads for the top four downloading countries: United States, Philippines, United Kingdom, India.

This year librarian Samantha Kennedy and Director of the Office of Sponsored Programs, Stephen Robishaw, conducted a series of three Faculty Focus Groups to determine faculty's research needs and how the Libraries can help meet these needs. Samantha and Stephen are putting together a report for the Division of Research and the Dean's office of each college/school.

To learn more about Rowan Digital Works, please visit the website below:

<http://rdw.rowan.edu/>

Congratulations to our award-winning faculty and staff on their achievements and success this year.

Michelle Kowalsky and Faye Robinson received the President's Excellence Award for Diversity.

Marita Malone was named a "Rock Star Medical Librarian" by the National Library of Medicine.

Nancy Demaris participated in the four-part Super Supervisor training sponsored by the Library Link consortium.

Zuleika Rodriguez-Cruz, the Health Science Library's Circulation Supervisor, was selected as the 2017 Library Support Person of the Year for the Health Sciences Libraries Association of New Jersey.

ABOVE: Faye Robinson (middle) receives the President's Excellence Award for Diversity from Dr. Ali Houshmand and Joseph Basso

Kowalsky, M. & Woodruff, J. (2017, April). Received award from New Jersey Library Association (NJLA) College and University Section and Association of College and Research Libraries (ACRL) New Jersey Chapter. Awarded the "2017 NJLA CUS Research Award," which honors the best published research completed by a New Jersey librarian each year.

Kowalsky, M. & Woodruff, J. (2017, March). Received award from the Rowan University Faculty Senate. Awarded the "Excellence in Diversity Award, for a Group Project by Faculty or Professional Staff," which honors outstanding contributions, commitment, and service exhibited in the areas of diversity, social justice, consciousness-raising and inclusion.

Kowalsky, M. & Woodruff, J. [Director, Academic Success Center and Disability Resources]. (2017, March). The book is ranked "#1 bestseller (in print)" for ALA Editions, as reported in American Libraries, 48(3/4), 74.

Kowalsky & Woodruff book listed as #1 of the top "3 Must Haves for Any and All Librarians" by Library Journal (2017, April 11).

Kowalsky & Woodruff interviewed by Phil Morehart, in "A Conversation with Authors Michelle Kowalsky and John Woodruff: Creating an Inclusive Library Environment" feature article in American Libraries [Online] (2017, April 6).

NEW APPOINTMENTS

Academic libraries are evolving and dynamic organizations. Rowan University Libraries deliberately hire well-qualified individuals to fill positions that are flexible and forward-thinking.

This year Rowan University Libraries welcomed 8 new librarians and staff members to the team. Our new staff members join a team that is committed to partnering with students, faculty, and staff to contribute to the momentum of Rowan University.

JENNIFER K. MATTHEWS
COLLECTION STRATEGY
LIBRARIAN

Jennifer earned her Master's in Library Science and Master's in Musicology from the University of Kentucky where she is also currently working on completing a Ph.D. in Musicology on Randy Newman. She lives with her two children, Lee and Melodie, in Southern New Jersey where they are active participants in Little League baseball and Softball. Jennifer is a chair of the Collection Committee and a member of the Faculty Success Strategic Planning group. She is also working with the Parental Leave task force and Autism Spectrum task forces on campus as well as the Digital Library Federation's Cultural Assessment working group.

LUCRETIA FORTE
ELECTRONIC RESOURCES
ASSOCIATE

Lucretia is an Electronic Resources Associate at Campbell Library, managing the print serials collection and binding as well as ensuring access to online resources. She earned a Bachelor's in Library Science from Arcadia University in Glenside, PA and has PA Department of Education certifications for public librarianship and library assistance. Prior to working at Rowan, she worked as a Circulation Supervisor at Moore College of Art and Design. Currently she also holds this position at Drexel University during the weekends.

BRANDON CARNEY
TECHNOLOGY SERVICE
SUPPORT SPECIALIST

Brandon is an alumnus of the Rohrer College of Business with a Bachelor of Science degree in Management Information Systems. Brandon has worked in the information technology field for the last four years. At his previous position, Brandon was employed as an Information Technology Specialist with the state's public school system. Brandon enjoys working with others, solving technical issues, and improving day-to-day operations. Outside of work, Brandon likes to spend time outdoors hiking, kayaking, and participating in sports.

MARRYAM NAQVI
LIBRARY ASSISTANT

Marryam is a library assistant in Campbell Library's Access Services Department. She graduated with a Bachelor of Arts degree in English from The College of New Jersey in 2016. Marryam would like to pursue further graduate studies in academia, specifically in History. Marryam enjoys being surrounded by books. Her favorite pastimes are reading and writing, photography, running, and travelling.

MICHAEL BENSON
COORDINATOR FOR DIGITAL
SCHOLARSHIP CENTER

Michael holds a Bachelor of Arts degree in Philosophy from West Chester University, a Master of Arts in Instructional Technology and Design from Stockton University and is pursuing Doctoral studies in Fine Art and Media Studies from Drew University. Mike's diverse professional experience includes design, publishing, instructional design, technology management, photography, and creativity studies. He has taught courses and workshops on graphic design, computer art, art education, multimedia development, and photography. He has exhibited his fine art in several regional galleries and public spaces.

MARITA MALONE
PUBLIC SERVICES LIBRARIAN

Marita was previously a Reference Librarian at the Medical Library at Cooper Medical School of Rowan University. In her previous experience, Marita held a library internship at Imperial College, St. Mary's Hospital in London. Marita has a Bachelor's of Library Science from the University of Maine and a Master's degree in Library and Information Science from Drexel University. Marita is married with four daughters and 5.4 grandchildren. She enjoys working on an extensive family genealogy project and traveling.

KATHRYN CROSKEY
MARKETING COORDINATOR

Kathryn is the Marketing Coordinator for Rowan University Libraries. In addition to running her own photography and graphic design business, Kathryn's previous work experience includes Advancement Director for a private institution as well as marketing in both corporate and retail business. Kathryn has a Bachelor of Arts in Journalism and Public Relations from Rider University, and is pursuing a Master of Arts in Public Relations. Kathryn lives in South Jersey and loves spending time with her husband and daughter.

SHILPA RELE
SCHOLARLY COMMUNICATIONS
& DATA CURATION LIBRARIAN

Shilpa earned her Master of Library and Information Science from UCLA, Master of Arts in Art History from the University of Minnesota and Master of Arts in History from University of Mumbai, India. Prior to joining Rowan University Libraries, Shilpa worked as the Digital Program Librarian at Loyola Marymount University in Los Angeles, CA and managed the Digital Library Program that comprised of digital collections, institutional repository and digital scholarship. Shilpa is new to the Northeast and is currently enjoying exploring the area with her family.

LOOKING AHEAD

COMING SOON

Campbell Library is very excited about our latest remodel, the expansion of University Archives & Special Collections. The Special Collections Room is currently located on the fifth floor of the tower, making it accessible solely by one elevator. During the summer of 2017, a new Special Collections Reading Room will be built on the third floor, making those collections more available to patrons and visiting researchers.

A public opening event is being planned for the new academic year.

ABOVE: Students study in the atrium of Campbell Library.

MAKING A GIFT

As the university grows, new library technologies and resources are needed to support Rowan's expanding curriculum and our diverse set of students, faculty, and staff.

Gifts to Rowan University Libraries have a tremendous impact across every area of campus. Whether making an unrestricted gift or supporting a specific program, support from alumni, parents and friends of Rowan University helps to provide the best opportunities for each of our students.

Please consider joining our efforts. For more information on how you can make a difference, visit this website:

giving.rufoundation.org.
